RE.: CORRECTIONS - ENROLLMENT STATISTICS WINTER 1972-73

Due to an oversight, pages 12 and 13 of the Enrollment Statistics Winter 1972-73 document contained a few errors. I am attaching a corrected copy of these pages.

Also, please note the minor corrections listed below:

Page 7 - 78 replaces 72 in the sixth column

Page 8 - 144 replaces 138 in the sixth column

Page 11 - under Coll. & U/G Eve. (Computer Science) a dash should appear - 3.0 is the total.

Please accept my apologies for any inconvenience this may have caused you.

ENROLLMENT STATISTICS

WINTER 1972-73

SIR GEORGE WILLIAMS UNIVERSITY

TO: DEANS, DEPARTMENT CHAIRMEN AND HEADS OF SERVICE.

The present document contains an analysis of undergraduate and graduate students registration together with data on faculty distribution for 1972-73.

Two main sources of data have been used for this purpose: (1) Computer Centre Registration file as of October 5, 1972 and (2) Department Chairmen for deployment of faculty. Due to the fact that the two sets of data were not produced simultaneously, data were not always compatible. We hope, however, that our interpretation has not distorted considerably the actual image of 1972 registration.

In order to avoid this situation in following years, in collaboration with the Cumulative Record Advisory Committee, we are planning to program these statistics on Computer. Besides assuring compatibility of data, this would present the main advantages of cutting down manual work, diminishing risks of errors, avoiding duplication and shortening delays. Since procedures are already being worked on, any comments or suggestions as to present format of statistics, needs for further analysis of data would be highly appreciated.

*This table should be used for general indication only. The establishment of numerical categories has its inevitable weaknesses. For example, a class which squeezes 52 students into a 50-seat room is probably in a different situation pedagogically from a class of 52 students in a 100-seat room.
